

# LA WHISKERIA

WHISKY • WHISKEY

Whi·sky or Whi·skey

[/'wiski'/] noun

If you're talking about a drink that's been made in Scotland, Canada, or Japan, use the spelling without the 'e'. When referring to drinks distilled in the United States or Ireland, use the 'e'.

Si está hablando de una bebida que se hizo en Escocia, Canadá o Japón, escríbelo sin 'e'. Cuando se refiera a bebidas destiladas en los Estados Unidos o Irlanda, escríbelo con la 'e'.

The Scotch Malt Whisky Society .....	14

**Scotch:** Scotch must be distilled, aged, and bottled in Scotland. Scottish law mandates that scotch be aged in oak casks for a minimum of three years. Scotch malt whisky producers traditionally operate in six specific Scottish regions: the Highlands, Campbeltown, Islay, Speyside, Lowlands & Islands. Scotch receives its smoky character from peat, a dense moss that is lit on fire to dry out the malted barley used in distillation. Unless a recipe calls for a particular scotch by producer or style, a blended scotch will be your best bet for most cocktails. Use a single-malt scotch if you're drinking it neat or on the rocks.

**Single-malt:** A single-malt whiskey comes from a single distillery and only contains one type of malted grain. A single-malt whiskey bottle may include whiskey from several different casks—unless it's a single cask whiskey.

**Irish:** A spirit must be produced from malt, cereal grain, and barley and distilled, aged, and bottled in Ireland to qualify as Irish whiskey. Irish whiskey must be aged in wooden casks for a minimum of three years. The more muted, malt character of Irish whiskey shines most when the spirit is aged in less conventional vessels like sherry casks or rum casks.

**Rye:** Rye a whiskey containing at least 51 percent rye in its mash bill. Like bourbon, rye must be aged in newly charred oak barrels if produced in the United States. In general, rye is lighter-bodied than many other whiskeys; you can identify it by its tingly spiciness.

**Bourbon:** Bourbon is American whiskey, often (though not exclusively) produced in Kentucky, that contains at least 51 percent corn in its mash bill or grain makeup. Bourbon must be aged in newly charred oak barrels if produced in the United States, which makes for a typically nutty flavor profile and a mellow, caramelized sweetness. A subtype of Bourbon, Tennessee whiskey is filtered through sugar maple charcoal before it is aged. This filtering method is the Lincoln County Process, and it is what gives Tennessee Whiskey its own unique flavor.

**Canadian:** Canadian whisky must be produced and aged in Canada, have a minimum of 40 percent ABV, and be aged for at least three years in wooden barrels no larger than 700 liters. Canadian whiskey can also contain caramel and other flavorings or additives, leading to diverse tastes between brands.

**Japanese:** Japanese Whisky is bottled in Japan, but it isn't necessarily distilled or aged there. Some Japanese whisky draws immediate comparisons to Scotch whisky, while other producers are continually evolving, harnessing the unique qualities of indigenous Japanese oak.

**Blended:** A blended whiskey is a mixture of different whiskeys, potentially produced by different distilleries.

**Escocés:** El escocés debe ser destilado, envejecido, y embotellado en Escocia. La ley escocesa exige que el whisky escocés se envejezca en barricas de roble durante un mínimo de tres años. Los productores de whisky escocés de malta operan tradicionalmente en seis regiones escocesas específicas: las Tierras Altas, Campbeltown, Islay, Speyside, Tierras bajas e islas. Scotch recibe su carácter ahumado de la turba, un musgo denso que se prende fuego para secar la cebada malteada utilizada en la destilación. A menos que una receta requiera un whisky escocés en particular por productor o estilo, un whisky escocés mezclado será su mejor opción para la mayoría de los cócteles. Use un whisky escocés de una sola malta si lo está bebiendo solo o con hielo.

**Single-malt:** Un whisky de una sola malta proviene de una sola destilería y solo contiene un tipo de grano malteado. Una botella de whisky de una sola malta puede incluir whisky de varios barriles diferentes, a menos que sea un whisky de un solo barril.

**Irlandés:** una bebida espirituosa debe producirse a partir de malta, grano de cereal, y cebada y destilado, envejecido, y embotellado en Irlanda para calificar como whisky irlandés. El whisky irlandés debe envejecerse en barricas de madera durante un mínimo de tres años. Cuanto más apagado, el carácter a malta del whisky irlandés brilla más cuando el licor se envejece en recipientes menos convencionales, como barricas de jerez o barricas de ron.

**Rye:** Rye, un whisky que contiene al menos un 51 por ciento de centeno en su factura de puré. Como el bourbon, el centeno debe envejecerse en barricas de roble recién carbonizadas si se produce en los Estados Unidos. En general, el centeno tiene un cuerpo más ligero que muchos otros whiskies; puedes identificarlo por su hormigueo picante.

**Bourbon:** Bourbon es whisky americano, a menudo (aunque no exclusivamente) producido en Kentucky, que contenga al menos 51 por ciento de maíz en su cuenta de puré o composición de granos. El bourbon debe envejecerse en barricas de roble recién carbonizadas si se produce en los Estados Unidos, lo que lo convierte en un perfil de sabor típicamente a nuez y suave, dulzura caramelizada. Un subtipo de Bourbon, El whisky de Tennessee se filtra a través de carbón de arce de azúcar antes de envejecer. Este método de filtrado es el Proceso Lincoln County, y es lo que le da al whisky de Tennessee su sabor único.

**Canadiense:** el whisky canadiense debe producirse y envejecerse en Canadá, tener un mínimo de 40 por ciento ABV, y ser envejecido durante al menos tres años en barricas de madera de no más de 700 litros. El whisky canadiense también puede contener caramelo y otros aromatizantes o aditivos, dando lugar a gustos diversos entre las marcas.

**Japonés:** el whisky japonés se embotella en Japón, pero no necesariamente se destila o envejece allí. Algunos whiskies japoneses generan comparaciones inmediatas con el whisky escocés, mientras que otros productores están en continua evolución, aprovechando las cualidades únicas del roble japonés autóctono.

**Blended 'Mezclado':** Un whisky mezclado es una mezcla de diferentes whiskies, producido potencialmente por diferentes destilerías.

# WHISK(E)Y FLIGHTS

## WHAT IS A FLIGHT?

A flight is a way to sample different whiskeys without ordering several types. Our flights come in 3 x 20ml glasses. Flights consist of a few whiskeys (usually three to five) with only a small amount for tasting. Flights are designed so you as the taster can compare notes and choose which you prefer.

## HOW DO YOU ENJOY A WHISKEY FLIGHT?

Swirl the whiskey so it coats the glass, then breathe deeply with your nose about an inch from the liquid. Open your mouth as you inhale to let the alcohol fumes escape so you can better discern other flavor notes.

## ¿QUÉ ES UN 'FLIGHT'?

Un 'Flight'; es una forma de probar diferentes whiskies sin pedir varios tipos diferentes. Nuestros flights vienen en 3 vasos de 20ml.

Los flights consisten en unos pocos whiskies (generalmente de tres a cinco) con solo una pequeña cantidad para degustar.

Los flights están diseñados para que tú como catador puedas comparar notas y elegir cuál prefieres.

## ¿CÓMO DISFRUTAS DE UN 'FLIGHT' DE WHISKY?

Agite el whisky para que cubra el vaso. luego respire profundamente con la nariz. Alrededor de una pulgada del líquido. Abre la boca mientras inhalas para dejar escapar los vapores del alcohol y poder discernir mejor otras notas de sabor.
